# MAN OVERBOARD

A MOB situation at sea is possibly the worst scenario for any crew and casualty and it is in these periods of 'peak panic' that both the crew and the person in the water must rely on their equipment, their knowledge of the equipment and the understanding of what to do in the situation.

Aiding the person in the water isn't just about having something to help keep them float, it's about security, visibility, location and retrieval.

All of the Jon Buoy products help with this and the flagship product, the Jon Buoy Recovery Module is a proven and tested piece of safety equipment that will help anyone in the water as well as assisting the crew on board. Built from Glo Lite fabric and with its unique lifting capability it will allow any crew to be able to recover a casualty safely and in a controlled manner.

For crews taking part in any of the fantastic events organised by the World Cruising Club this is a must have piece of safety equipment.

# LIFERAFTS

Your liferaft is a piece of safety equipment we all hope to never have to use but it is also a piece of equipment that is mandatory if you are taking part in World Cruising Club event.

Using your liferaft starts when you purchase or hire it – you must ensure you get a raft built to the correct ISO 9650 Part I standard with the correct emergency pack.

Where you are going to stow the liferaft is vital – liferafts are never easy to move (even in a marina) so ensure you mount your liferaft somewhere you can move it easily in the worst-case scenario.

You need to plan how to use your liferaft in advance - reading the instruction just as you deploy is not recommended. Learn and understand the equipment you have at your disposal and make sure ALL your crew know as well.

Don't buy or hire your raft just based on cost or on the assumption that 'it will never happen to us' – it just might. Base your selection on what suits your crew and vessel best. If you don't want to buy a liferaft then consider the hire option which is ideal for specific trips or hassle-free servicing.

Ocean Safety's Ocean ISO & Ocean Regatta rafts are perfect for WCC events.
